

Cheval Website

System Operation Change

This change only applies to PC or Laptop access to the website. The Mobile/Tablet access has not changed.

When you hover over the 'Events Gallery' tab, for PC or Laptop access, then it no longer gives a drop-down selection to enable you to select the required event in the gallery. It now operates as follows (Choose 1 or 2):

- 1. Clicking on the 'Events Gallery' tab displays a page with all available events represented by a photo. Scroll up/down as required to view. Hovering over a photo will show an enlarged photo with the description of the event. Click on the required photo to display the event.**
- 2. Hovering over the 'Events Gallery' tab will display a 'Select Event' button below it. Click on this 'Select Event' button to display a page containing all the Sections of the events gallery. Hovering over any section will display its contents. Click on any content line to display the event.**

It may be necessary to scroll the page up before hovering over a lower section in order to see all its content.
